# ecoVision

## Modular as you have never seen it before

Engineered with lots of imagination, our **BRAND-NEW** beautiful, sleek, and **eco-friendly** solutions provides a bespoke look and feel while being the most sustainable solution for events and exhibitions

The aluminium frames can be reconfigured no matter the size or location of the stand, none of the materials are wasted, all frames are based on a hire only basis and completely reusable. If any of the parts of the stand can't be reused like the Foamex or fabric graphic panels, **we make sure these are 100% recycled**
# Everything you need to bring your stand to life

Below is a list of available upgrades so that you can add to create your ideal vision

*Please note that you can upgrade the height of your stand depending upon the location on the show floor.

# Fun Facts

We opt for a **100%** reusable end product and for sustainable materials. Did you know aluminium is the most commonly found metal on our planet? It's strong, yet light. It has a long life cycle and is fully renewable. This results in greener and smarter solutions for everyone. The recycling process only requires about 5% of the energy compared to the production of primary aluminium. We can say that at least 75% of our frames are produced from recycled aluminium. **Another impressive fact: 75% of all the aluminium ever produced is still in use**
