

## Get Harrogate ready

As you can imagine, Harrogate International Nursery Fair brings thousands of people into the North Yorkshire town of Harrogate, not only for the duration of the show, but for several weeks before and after with exhibitor teams setting up and breaking down stands. Therefore, accommodation in the town books up fast. If you haven't already secured a hotel or guest house to stay, we highly recommend you do so sooner rather than later.

If you aren't familiar with the town and where to stay, our show partner Mice Concierge is happy to help - [Nursery Fair 2024 Harrogate \(miceconciierge.me\)](https://miceconciierge.me)

Visit the website at [www.nurseryfair.com](https://www.nurseryfair.com) where you can find useful information to make your visit as easy as possible.

## Latest exhibitor news:

### Sleep tight

ergoPouch makes premium, natural fibre sleepwear and sleep solutions for babies and kids that are ergonomically designed and TOG-rated for warmth.

Sleep in the first five years is difficult and full of challenges. Our range spans newborn to six years old, and is designed to take the guesswork out of dressing a child safely for sleep, no matter the temperature.

Made from certified organic cotton and natural fibres with ethical and sustainable manufacturing processes, our

products care for the environment as much as they do the child. An ergoPouch is non-toxic, skin-friendly and will last several years across several children.

## Creative play

Plus-Plus, located in Denmark, creates toys which spark the imagination and creativity in children of all ages with the aim to set play free! Plus-Plus is internationally recognised as a high-quality brand and is the winner of multiple prestigious product awards across the globe, encouraging kids to be creative and explore building a world of 2D and 3D models and puzzles using these tactile, open ended play pieces. After a successful re-launch in the UK in 2023, bringing the sales and marketing functions in-house, and working directly to build long term partnerships with retailers, 2024 offers the opportunity to build on established relationships and increase reach further into the retail and leisure sectors.

## Baby health

Kingslac established in 2003, the British pediatric laboratory professional development, is committed to providing 'scientific, safe, effective, additive-free' nutritional dietary supplements. The main product Kid's calcium magnesium & zinc has no added sugar/preservatives/flavors/colors, easy to be absorbed by the baby's calcium citrate and compounded with three probiotics + VD3 + VK2, can better promote the baby's calcium absorption, improve immunity and regulate intestinal health.

Each strip contains 250mg of calcium, which is in line

with the daily calcium intake requirements of babies, allowing babies to grow up healthier.

Kingslac (distributed by Bonalife) can't wait to showcase these products at this year's show!
